				Jim Maas, our contractor is going to replace the existing roof on the north office building ONLY. There is a connecting roof between the two buildings that is failing. He is going to reinforce the existing connecting roof and then put new shingles on that roof as well. The south building will not get a new roof as the shingles are still in good condition. The drip edge, ice 'n water, some sheets of OSB if they are rotted will be replaced. New boots, vents and ridge vent will be installed. Some of the soffit and fascia needs to be replaced, but it's only patch work as some has fallen off.			

The majority of the decking will be saved, but on the north side roof there may be some pieces that have to be replaced before the new ice 'n water is installed.
